Will A Tunnel Be Part Of Your Treatment Plan?

You may have heard that Allegheny Health Network is opening what they call a “micro” or “neighborhood” hospital miles away from their main facilities in Pittsburgh or Monroeville.

But are they really a hospital in the true sense of the word?

Can they perform an emergency cardiac catheterization or bypass should you need it? Are they a designated primary stroke center? Do they have an intensive care unit?

And if your condition or injury requires advanced care, will a trip through a tunnel be part of your treatment plan?

At Excela Health, we offer a spectrum of care that is complete, connected and convenient for residents of Westmoreland and the surrounding counties.

We just don’t call ourselves hospitals. We are hospitals. Defined not by size or location, but by what we do.
